**La Scienza del
RISVEGLIO**

Trattamento cellulare Antietà per capelli
ad azione fortificante e rigenerante

STEMCELL therapy[®]

cellule staminali vegetali attive

P

otentissimo trattamento cellulare antietà per capelli ad azione fortificante e rigenerante.

Ha una funzione:

- Antiossidante
- Antistress
- Anticanizie
- Anticaduta

Clinicamente efficace nel favorire la ripresa funzionale dell'attività dei follicoli piliferi e del cuoio capelluto.

Moltiplica le cellule creative di fibre cheratiniche nuove.

Il trattamento è indicato particolarmente nell'alopecia androgenetica, alopecia comune e da chemioterapia, diradamento, ipotrichia, incanutimento e indebolimento dei capelli sia maschile che femminile.

Powerful anti-ageing cell treatment for hair with strengthening and regenerating action.

It has the following functions:

- Anti-oxidising
- Antistress
- Anti-white hair
- Anti hair loss

Clinically effective, favouring the resumption of activity in the scalp and in hair follicles.

Multiplies cells that create new keratin fibres.

The treatment is especially indicated for androgenetic alopecia, common alopecia or alopecia caused by chemotherapy, thinning, hypotrichia, greying and weakening of hair in both males and females.

Wirkungsstarke Anti-Aging-Zellenbehandlung mit stärkender und regenerierender Wirkung für das Haar.
Wirkt:

- Antioxidierend
- Gegen Stress
- Gegen Ergrauen
- Gegen Haarausfall

Klinisch wirksam, indem die Wiederherstellung der Funktionsfähigkeit von Haarfollikeln und Kopfhaut gefördert wird.

Vervielfacht die Anzahl der Zellen, die neue Keratinfasern erzeugen.

Die Behandlung ist besonders bei androgenetischem und allgemeinem Haarausfall, nach Chemotherapien, bei schütterem Haar, Hypotrichose, Ergrauen und Schwächung sowohl männlichen als auch weiblichen Haares angezeigt.
